

Command Prompt - mongo groceries

Enable MongoDB's free cloud-based monitoring service, which will then receive and display metrics about your deployment (disk utilization, CPU, operation statistics, etc).

The monitoring data will be available on a MongoDB website with a unique URL accessible to you and anyone you share the URL with. MongoDB may use this information to make product improvements and to suggest MongoDB products and deployment options to you.

To enable free monitoring, run the following command: `db.enableFreeMonitoring()`

To permanently disable this reminder, run the following command: `db.disableFreeMonitoring()`

```
--
show dbs
admin      0.000GB
config     0.000GB
groceries  0.000GB
local      0.000GB
> show collections
uncaught exception: SyntaxError: unexpected token: identifier :
@ (shell):1:5
> show collections
items
> use groceries
switched to db groceries
> show collections
items
> show collections
items
> db.groceries.find()
>
```

```
re>
</body>
</html>
```

```
C:\Users\User\groceries>
```
